

## Questions & Answers Round 2

### Request for Quote (RFQ) Ref. #: UNDP-OHR-2020-003 “Capability Map Digital Solution”

1. Q: Are the number of days in the tentative time frames only estimates for guidance to contractors or are they strict days that need to be adhered to? For example 6 days for specification mapping within a Tentative time frame of 15-30 August 2020.

We need clarifications on this because from experience, we think some of the specified days are very time optimistic considering the length of time for interactions with UNDP stakeholders and time for reporting the findings.

**A: These dates are estimates.**

2. Q: After the Contractor/Consultant supports the RFP process for the technical solution and it is launched, will the consultant be involved in the Technical evaluation of the received RFP bids? This is not stated in the scope of work but we just wanted to clarify that we haven't misunderstood the scope.

**A: For now we did not include this service in the scope, but this could potentially be added later on, if needed.**
