		Q&A
1	Q	a) Double confirm on Lot 1, this config will be used for Azure Stack instead of Azure Stack HCI? b) Will Lot 2 also used for new Azure Stack? Or it will be used for existing server?
	A	a) Configurations are for Azure stack b) New Azure stack
2	Q	General Question: All license in Lot 2 will be used for new Azure Stack or existing azure stack/other server?
	A	For new Azure Stack
3	Q	Database Server: D4 V2 by default 8 vCPU and 28GB vRAM, instead of 8 vCPU and 24GB vRAM Please confirm on the spec
	A	Confirmed. The Azure VM instance size **D4 V2** (required Database server) has 8 vCPUs and 28 GB RAM
4	Q	DB & Apps Server One year or 3 years subscription for D4 v2 and D8 v3?
	A	1-year subscription
5	Q	Windows Server 2019 Standard (WS2019): a) Will WS2019 be used for database server and application server on Lot 2? Because Microsoft have bundling price for VM license and WS2019 b) Also please confirm for quantity. If bundling then we need 2 license of WS2019 only or 2 license of WS2019 + 3 individual licenses?

	A	a) Windows Server 2019 license should be for the two VMs. During VM creation, you will choose to use an existing Windows server license. However, Azure VM supports Windows Server Datacenter images. b) ==WS2019 license quantity required is 2. WS2019 Standard image may not be supported on Azure so should go for Windows Server 2019 Datacenter licenses.==
6	Q	SQL Server 2019 Standard (SQL2019) Will this SQL2019 be used for database server? Because Microsoft have bundling price for VM license and SQL2019
	A	Yes, the SQL server 2019 standard will be used on the database server. The database server will be provisioned with OS only so the SQL server will be installed on the VM manually.
7	Q	SSL Certificate for D365BC web client a) Do you have any requirement for the provider? As I'm still waiting from Microsoft whether they can provide the SSL certificate b) How many domain for this certificate?
	A	a) The SSL can be acquired from any certified provider such as DigiCert, Comodo etc. Microsoft does not provide SSL. b) one domain required for the certificate but should be wildcard to support several subdomains for each disease component.
