

Section II: Schedule of Requirements

eSourcing reference: RFQ/2021/18673

This heavy-duty net is manufactured in an 82" x 82" size — larger than typical 42"- sized nets. These are excellent to use at the back of the trailer to protect packages that shift during transit. The larger size covers the majority of the trailer from top to bottom, so it's great for creating a separate space within the trailer. Features ratchets to tension and spring E-fittings to allow for quick and easy installation into E-track (not included). The 2" wide industrial-grade polyester webbing offers maximum strength and hold with minimal stretching.
