First Addendum for RFP 03

FACILITY ASSESSMENT FOR REPRODUCTIVE HEALTH COMMODITIES AND SERVICES In Afghanistan

1. The RFP documents show the number of health facilities (189) from which data should be collected but did not mention about the number of clients that should be interviewed per health facility or number of health providers that should be interviewed per health facility. So, how many clients per facility should be interviewed and how health providers per each health facility should be interviewed? Or we should propose the sample size based on the well-defined criteria in the proposal?

Answer: You can propose based on RFP criteria, we need information from Health workers involved in FP service delivery such as MW or Female MD and staff involved in pharmaceutical management

2. Also, Key Informant Interviews (KIIs) with relevant stakeholders are not mentioned in RFP document, we think it will be useful to include KIIs relevant stakeholders (MoPH, BPHS/EPHS implementers, AFGA, MSI, supply chain management of implementers) so that we can have better picture of the RH commodities in Afghanistan. So, is it possible to include KII in our proposal?

Answer: The KIIs will cover the relevant stakeholders as you listed which plus USAID projects, WHO, one or two donor agencies, and some other relevant partners such as MOWA , Medical universities, Pharmacy university , and IHS

3. Can you share the data collection tools (questionnaires, checklists etc.) or mention the time taken by each tool to be completed ?

Answer: Ok, we will share it

UNFPA- because everyone counts
