

**TERMS OF REFERENCE
for**

**ESTABLISHMENT OF A LONG-TERM ARRANGEMENT TO IMPLEMENT THE PROJECT GIGA “
ACCELERATE” SCHOOL CONNECTIVITY IN SIERRA LEONE**

1. BACKGROUND

The fundamental mission of UNICEF is to promote the rights of every child, everywhere, in everything the organization does — in programs, in advocacy and in operations. The equity strategy, emphasizing the most disadvantaged and excluded children and families, translates this commitment to children’s rights into action. For UNICEF, equity means that all children have an opportunity to survive, develop and reach their full potential, without discrimination, bias or favoritism. To the degree that any child has an unequal chance in life — in its social, political, economic, civic and cultural dimensions — her or his rights are violated. There is growing evidence that investing in the health, education and protection of a society’s most disadvantaged citizens — addressing inequity — not only will give all children the opportunity to fulfill their potential but also will lead to sustained growth and stability of countries. This is why the focus on equity is so vital. It accelerates progress towards realizing the human rights of all children, which is the universal mandate of UNICEF, as outlined by the Convention on the Rights of the Child, while also supporting the equitable development of nations.

Since 2014, UNICEF Sierra Leone has been championing the use of innovation and technology to help identify and address the issues that affect the children and women of Sierra Leone. Work done over the past 6 years has established UNICEF Sierra Leone as the leading agency for innovative and technology based programming to help deliver results for children in Sierra Leone.

In 2018, the Government of Sierra Leone established a new Directorate of Science, Technology and Innovation (DSTI). DSTI’s mandate is to use Science, Technology and Innovation to support the Government of Sierra Leone to deliver on its national development plan effectively and efficiently; and to help transform Sierra Leone into an innovation and entrepreneurship hub. UNICEF Sierra Leone has already established a workplan with DSTI to promote and enable the use of Innovation in Sierra Leone for improved results for children.

Since 2019, the Government of Sierra Leone has been a member of Project Giga, a global UNICEF-ITU initiative to connect every school to the Internet, to enable every young person to access information, opportunity, and choice.

Project Giga aims to expand connectivity through its focus on four main pillars of work:

- 1) Map: identifying the locations and connectivity status of every school and determining connectivity gaps;
- 2) Connect: supporting the expansion of safe, secure, reliable, fit-for-purpose infrastructure to support future digital development needs;
- 3) Finance: building affordable and sustainable country-specific models for finance.
- 4) Empower: deploying open-source digital solutions and ensure young people and communities leverage connectivity to reach their full potential.

The Giga approach to expanding school connectivity includes consideration of the role that laws, policies and regulation have on the commercial feasibility of various connectivity approaches and options. Giga also considers how innovative uses of technology and business models can help close connectivity gaps.

Giga Accelerate is an initiative, part of the Giga partnership, that explores the provision of broadband connectivity solutions to schools in order to fast-track governments' universal connectivity programmes by testing the following:

- 1) high frequency data to monitor quality of connectivity service,
- 2) procurement models,
- 3) demand aggregation,
- 4) new and diverse technologies,
- 5) sustainable business models, and other approaches that will help augment and inform national connectivity programmes.

UNICEF Sierra Leone wish to contract one or more Internet Service Providers to support the implementation of pillar number 2: “ Connect”, as outlined above, under a long-term agreement (LTA) for a period of 2 years renewable for 1 more year subject to satisfactory performance of services.

2. OBJECTIVES, PURPOSE & EXPECTED RESULTS

The overall objective of this specific service provision is:

To enable the design, planning and establishment of innovative, reliable and affordable solutions to provide continuous Internet connectivity to schools in Sierra Leone, including all necessary related maintenance services.

To develop sustainable business models for school connectivity

The designated school locations are listed in Annex A and are divided into 4 lots of 30 schools.

Depending on the technical viability, cost, and proposed business model, a bidder may be awarded up to a maximum of 2 Lots of schools. Further, UNICEF may, at a later date, choose to expand the contract to include more schools.

The expected result(s) of this initial phase shall be to develop and deploy innovative and affordable solutions to provide Internet connectivity to a minimum of 30 schools per lot with reliable and sustainable broadband internet service for and initial 12 months, along with the proposal of a business model for sustainability that could, for instance, allow the school to monetize the connectivity to fund its sustainability.

It is further noted that Giga will extract insights from the newly installed connectivity services, procurement processes and business model, that will inform further collaboration and further school connectivity with the Government of Sierra Leone.

3. DESCRIPTION OF THE ASSIGNMENT

The contractor must provide internet connectivity services with the below parameters for a minimum duration of 12 months, subject to further extensions for the period of the LTA.

- Ensure the provision of reliable and continuous high-speed internet connectivity services, including backhauling and internal provisioning through at least one Access Point per school and servicing with unlimited data volume. The bandwidth must be a constant minimum of 20 Megabits per second (Mbps) of download speed and 10 Mbps of upload speed, per school.
- Install at least one vendor-neutral Internet Access Point with a minimum of 100-meter coverage radius for at least 200 concurrent users, per school.
- Deploy adequate power supply and protection equipment for all active connectivity equipment, per school.
- Centrally manage administration of the installed network, including filtering of content, with particular note to for child online protection (as a reference providers can access the ITU Guidelines on Child Online Protection here: <https://www.itu.int/en/ITU-D/Cybersecurity/Pages/COP.aspx>).
- Provide and share with UNICEF real-time monitoring of all access points and networks at individual school level via an API. (KPIs include, but not limited to,; connectivity status, upload and download speeds, latency, packet loss, up and down time, etc.).
- Ensure maximum availability of connectivity by ensuring availability of required vendor neutral connectivity equipment and through the maintenance or replacement of the equipment for a minimum duration of the LTA.
- Provide proven basic training on the installed connectivity solution to at least two designated focal points, per school.
- Provide dedicated technical support through a central point of contact to address technical issues within agreed SLAs.
- Propose a commercially sustainable business model for participating schools to monetize the connectivity in order to fund the sustainability of the connectivity services.

- Support the Implementation of the proposed business model in an agreed subset of the preidentified schools.

UNICEF will only pay for the last-mile equipment necessary to connect schools and monthly service fees. Backhaul costs should be built into the monthly service provision cost. In case solution providers do not own backhaul infrastructure, they must clearly demonstrate they have established partnership(s) with backhaul infrastructure owners which specific agreed upon usage rates which can accommodate the project requirements.

4. DELIVERABLES

- Implementation plan: Submission of a detailed plan for the rollout of the proposed solution for each school in an awarded Lot. The plan should include:
 - Clear timelines for when each school shall be connected,
 - Details of the technologies to be used for each school, including hardware.
 - Listing of a dedicated fixed IP address per school.
 - Specification of API (or otherwise) details for the provision of the real-time monitoring of all access points and networks at individual school level. (KPIs include, but not limited to, : connectivity status, upload and download speeds, latency, packet loss, up and down time, etc.).
 - Planned basic training agenda on the installed connectivity solution for school level focal points.
 - Detailed rollout strategy for proposed commercially sustainable business model to monetize the connectivity in order to fund the sustainability of the connectivity services.
- Equipment Procurement : Procurement and designation of all required equipment to fully complete the project. A procurement plan including sources of such procurements, potential brands and standards to be provided.
- Installation and Deployment of connectivity :
 - Installation and provisioning of the connectivity equipment and testing of connectivity services at school level.
 - Deployment of training for school level focal points.
- Monthly connectivity service 1
 - Service charges for bandwidth (Month1 – Month6)
- Monthly connectivity service 2
 - Service charges for bandwidth (Month7 – Month12)

5. REPORTING REQUIREMENTS

Below are the minimum required reporting mechanisms for the project :

- Implementation plan – as detailed in deliverables. Soft and hard copy.
- Equipment Procurement report. Soft and hard copy.
- API level real time monitoring access.
- Final Project Report. Soft and hard copy.

6. LOCATION AND DURATION

Location: Attached in Annex 1 is the list of schools (120) to be connected, set out in 4 lots of 30 schools.

Duration: The duration of the LTA is for a minimum period of 2 years with a possibility of extension of 1 more year based on positive evaluation.

7. QUALIFICATION REQUIREMENTS

A successful bidder should fulfill the minimum requirements below:

- ✓ Bidders for this project should have a minimum of 5 years of experience in the delivery of reliable and continuous internet connectivity services and be authorized to legally operate and provide Internet connectivity services in Sierra Leone.
- ✓ Bidders for this project should have proven technical skills and experience of implementing projects of a similar national scale and complexity. Samples of work and information on the implementation of similar projects in proposal is required.
- ✓ The solution provider should own or have access to middle mile telecommunications infrastructure (backhaul) and have the ability to extend it to all the school locations listed in the Annex.
- ✓

To be compliant the successful bidder must submit:

- ✓ **The Business Registration.**
- ✓ **The valid NRA and NASSIT.**
- ✓ **Proof of Legal Authorization to provide connectivity related services in SL.**

In case of the award the service provider will have to submit in addition of the above:

- ✓ **UNGM Number**
- ✓ **Financial statements (audited if possible) for the last 2 years**

8. EVALUATION PROCESS AND METHODS

Bidders are expected to submit both *Technical and Financial proposals (separately)*. The criteria for evaluation are summarized below and will be scored using a ratio between the technical and the commercial criteria of 70:30 (technical/commercial). Sum of technical and commercial will equal to 100 points.

Item	Technical Evaluation Criteria	Max. Points
1	<i>Overall Response e.g. the understanding of the assignment by the proposer and the alignment of the proposal submitted with the ToR</i>	5
1.1	<i>Completeness of response</i>	2.5
1.2	<i>Overall concord between RFP requirements and proposal</i>	2.5
2	<i>Company and Key Personnel</i>	20
2.1	<i>Range and depth of organizational experience with similar projects</i>	5
2.2	<i>Samples of previous work</i>	8
2.3	<i>Key personnel: relevant experience and qualifications of the proposed team for the assignment</i>	7
3	<i>Proposed Methodology and Approach e.g. Work plan showing detail sampling methods, project implementation plan in line with the project</i>	45
3.1	<i>Proposed work plan and approach of implementation of the tasks as per the ToR</i>	20
3.2	<i>Implementation strategies, monitoring and evaluation, quality control mechanism</i>	15
3.3	<i>Innovative approach</i>	10
	TOTAL TECHNICAL SCORES	70

8.1 Technical Evaluation Criteria

Technical offers will be scored out of **70 points**. Offers with scores less than 49/70 will be disqualified. A reference check and site visit will be conducted on companies meeting the minimum technical requirements.

8.2 Financial Proposal Structure

Bidders are expected to submit their estimated costs for each school in a proposed lot. The break down should include:

- *Capital Costs:*
 - *Connectivity infrastructure – hardware.*
 - *Connectivity infrastructure – power supply (if any).*
- *Installation and set up cost.*
- *Training costs (if any).*
- *Operational costs:*
 - *Bandwidth provision costs – monthly rate.*
 - *Maintainense and support costs (if any).*
- *Other associated costs (if any).*

A financial template with the above detail is provided in Annex 2.

Financial offers will be scored out of 30 points. 30 points will be allocated to the lowest offers among the technical acceptable offers. All other price proposals receive scores in inverse proportion according to the following formula:

$$\text{Score for price A} = (30 * \text{Price of lowest priced proposal}) / \text{Price of proposal A}$$

9. ADMINISTRATIVE ISSUES

- All administrative/travel and custom charges should be borne by the service provider.
- Bidder should provide an all-inclusive cost in the financial proposal, factoring in all cost implications, materials, equipment and others for the required service / assignment, with details of budget line items
- The selected service provider will assign a dedicated Account Representative available to interface directly with authorized staff to address and/or resolve account issues
- The provider shall meet periodically with the (Contract Manager or Service Level Manager), to discuss issues of mutual concern, to review the vendor's performance and to discuss improvements which the provider should make in order to achieve more effective services and support.
- References from other clients must include contact person for reference check.

10. PROJECT MANAGEMENT

The contract will be supervised by the Innovation Specialist at UNICEF Sierra Leone, or by another designated officer of UNICEF Sierra Leone.

11. PAYMENT SCHEDULE

- Implementation plan & Equipment Procurement : Payment for approved, vendor neutral, hardware along with apporved implemntaton plan.

- Installation and Deployment of connectivity: Payment of setup/installation charges after confirmed connectivity initialisation (subject to API level access point monitoring).
- Monthly connectivity/service 1 : Payment of connectivity/service charge after 6 months of service delivery.
- Monthly connectivity/service 2 : Payment of connectivity/service charge after 11 months of service delivery.

BUDGET : ESTIMATION OF COSTS + WBS + GRANT

WBS : 3900/A0/08/880/005

Grant : SC200857
