To the attention of: Bidders to RFP for Creation of multimedia content and equipment supply

#### **Dear bidders**

Please see additional technical documentation as divided in folders. Please be advised that the conservation (physical repair work) is already ongoing for following sites:

- Venetian Tower
- Ethnographic Museum in Kavaja
- Ethnographic Museum in Kruja
- Hamam in Durres

The sites including Archeological Museum in Durres and Castle of Bashtova are still under design.

Since many of the equipment necessary for digital interpretation needs cabling, the majority of equipment is already provided for Venetian Tower and Hamam in Durres and for Ethnographic Museum of Kavaja. For this purpose, we are sharing drawings and BoQ listing all equipment for these 3 sites.

The equipment was not provided for the Ethnographic Museum of Kruja, and therefore it is a subject of this procurement. For this purpose, we are sharing drawings and BoQ for this site.

For the sites in designs including Archeological Museum in Durres and Castle of Bashtova your proposal of content would need to identify all the necessary equipment, however purchasing of the equipment would be a part of the separate procurement which would aim at implementation of the construction works. For more information please see drawings and BoQ for these 2 sites.
