

Q&A
LLINs distribution Sudan 2022

1. Sorry to approach you directly but as we are working on storage pricing, we noticed that some of the cargo shall start arriving at site starting May 2022. (this is correct as some containers are already at Port Sudan)
2. Can you please advise what is the minimum & maximum storage period these 9 600 000/- bed nets will stay on each site? (Given the nature of this campaign, the exact period is not pre-determined but will be between 1 to 6 months. Bidders are advised to quote a monthly rate

And for insurance, bidders should note that CIF cost per bed net is **2.03 USD**

3. May I ask if it is possible for UNICEF to extend the submission deadline by an additional one (1) week? The bid closing date been extended to 1st May 2022
1. Also we note the document was prepared on 5th April with stated closing date of 10th April. Can you please confirm that this RFP is still actually valid before we begin working on it. FYI the bid is a rebid the same LRPS was used in the initial bit . in this regard the closing date is 1st May 2022 .
