

QUESTIONS AND ANSWERS**CALL FOR PROPOSAL REF: 11875-003-2022-03****Capacity Building modules for the Renewable Energy Methodology**

Question	Clarification
In the description of scope of work (Section 2), it says that "to achieve the objective, the Grantee(s) will develop a set of CB modules following the model of the existing CB modules." Would it be possible to have access to one of the modules?	The existing CB modules can be accessed via this link .
The "model of the existing modules" refers to the "powerpoints for interactive presentations (e.g., during synchronous virtual or in-person live workshops, as opposed to self-paced asynchronous online learning), instructional narrative to guide the user, and include exercises and examples"?	The models refer to the presentations, the narrative guide is embedded in the notes of the powerpoints.
Concerning the multiple choice exercises, would it be possible to add another didactic strategy such as brief debates or group exercises?	Other didactic strategies can be added, provided that they are self-explanatory and can be self-managed.
