

Advisory Services to WMO and ANAM Chad for Strengthening NMHSS' capacities
for multi-hazard early warning in Chad

RFQ 2212-22

Clarification No. 1

14 September 2022

1. " "In the TOR, last para of "Introduction and rationale", that a "mid-term review of the project" is supposed to be completed in April 2022 and will provide recommendations for enhancement and efficiency of the delivery by WMO. Would it be possible to share the recommendations which will be the central to the advisory services under this RFQ?"

Please note that the ToRs already include a link to the project monitoring tool. Also, the preparation of the mid-term evaluation report was delayed. There is a draft, which can now be found in the Documents tab.
