Dear Sir/Madam,

We hereby solicit your Bid for the supply of the following **items, structured in two different lots**, with the following technical specifications:

**LOT 1: Ukraine****Item No. 1: Mobile Maternity Unit**

**Quantity: TWO (x2)** Mobile Maternity Unit to be delivered to Kyiv, Ukraine

**Type of structure:** This mobile maternity unit should consist of a **20ft container sized unit**, placed on a truck flat bed or similar (the truck is to be included on the offer), and designed to facilitate health services for essential maternal care, including normal deliveries.

All necessary technical installations should be delivered with each of the units including the following minimum mandatory requirements:

- Design: Gynecological examination room, recovery/neonate area, and shower area.
- internal autonomous water purification system
- water storage tank for clean water
- water storage tank for waste water
- AC Outlet Power – 220V 50Hz or matching
- AC Plug/Socket Type – Type C (Dedicated sockets for specialized equipment may have their compatible sockets)
- Energy supply through a generator **Diesel 6 KVA**. The generator should be integrated in the unit.
- Air condition (supplier to determine capacity)
- Solution to connect the unit to the public electrical network (Ukraine electricity standard EN 50160:2014 - 230V / 50Hz)
- Work desk
- Swivel stool (Qty .2)
- Dedicated cabinets for medicines, supplies and equipment.
- Spare wheel, Hydraulic Jack and matching wheel Brace
- Outdoor Sun Canopy integrated with the unit (installed on one side of the unit)

The 20ft container should have a recovery area easy to set up. This system should be easy to install and should be for field use. It is recommended that the entrance to the mobile maternity unit be situated at the

rear rather than the side, as this would facilitate the smooth and efficient maneuvering of the stretcher during patient transfers.

**Specific requirements for Vehicle: (Lot 1- Ukraine )**

- **Emission Standard - EURO 5**

This unit needs to serve as space to conduct deliveries not requiring surgery (clinical delivery at BEmONC level).

Your proposal should include your technical solution and drawings related to our needs.

Availability: The Two (x2) units must be ready in (45) days after issuance of the PO to be shipped to Kyiv, Ukraine.

Inventory: Basic equipment and furniture should be supplied together with the unit, and to be quoted separately as per below:

**Item No. 1a: Bed, labor/delivery** Quantity: 1- per Mobile Maternity Unit. See description and specifications in Annex 1

- Design: Gynecological examination room, recovery/neonate area, and **WC lavatory**
- internal autonomous water purification system
- water storage tank for clean water
- water storage tank for waste water
- AC Outlet Power – 230V 50Hz or matching
- AC Plug/Socket Type – Type G (Dedicated sockets for specialized equipment may have their compatible sockets)
- Energy supply through a generator **Diesel (4) KVA**. The generator should be integrated in the unit.
- Air condition (supplier to determine capacity)
- Work desk
- Swivel stool (Qty .2)
- Dedicated cabinets for medicines, supplies and equipment.
- **PV Solar Panel System mounted flat on the roof with battery backup, to be used amidst the fuel shortage.**
  - **Capacity: 2.5 kW Hybrid Rooftop Solar Power System**
  - **Solar PV panels: mono PERC panels of 500 W or higher capacity for a total capacity of 2.5 kW + or -10%**
  - **Inverter: 2.5 kW, 230 V, 50 Hz hybrid inverter with an efficiency higher than 95%**
  - **Battery: 8 kWh capacity @24V gel type ( usable size 40 kWh)**
  - Surge protective devices for AC and DC systems
  - Manual Transfer Switch
  - AC and DC cables, and other accessories in required capacities as necessary
- Spare wheel, Hydraulic Jack and matching wheel Brace
- Outdoor Sun Canopy integrated with the unit (installed on one side of the unit)

The 20ft container should have a recovery area easy to set up. This system should be easy to install and should be for field use. It is recommended that the entrance to the mobile maternity unit be situated at the rear rather than the side, as this would facilitate the smooth and efficient maneuvering of the stretcher during patient transfers.
