

Question	Answer
<p><i>"A minimum of two (2) reports or references from similar projects completed in the past that are considered relevant to this Call for Proposals"</i> - could you provide guidance on any specific format or template for the references?</p>	<p>We do not have a specific template for the references.</p> <p>Generally, the requirement to submit reports/reference letters serves for us to be able to determine an applicant's past experience on the subject matter. It is therefore important that the reference letter mentions the title of the project and ideally a brief summary on what the outcomes/activities were, and the duration and funding of the project, as well as the level of engagement of the applicant. In general, we also like to see project reports, but if those are not available or cannot be shared, a reference letter is fine. You may also link to any supporting documentation on the project(s) available online if relevant.</p>
<p>Considering the evolving landscape of renewable energy policies, we are interested in understanding the specific updates and improvements planned for the Renewable Energy Guide. What areas of policy coverage are envisaged, and how will the usability of the guide be enhanced to meet the emerging needs of developing countries?</p>	<p>It is envisaged that the applicant will scope these points as part of Activity 1, and to outline how those will be addressed in the proposal.</p>
<p>Could you kindly provide clarification on whether providing audited financial statements is a mandatory condition for applicants that are not required to have those, e.g. for-profit-companies? If yes, is a non-audited financial statement stamped and signed by the applicant acceptable?</p>	<p>If audited financial statements are not available, financial statements certified by the applicant are acceptable. If possible, please add an explanation or link to the applicable legislation making this non-mandatory for your company or organization.</p>
