

RFQ 629293-REM-Provision of specialized vehicles for Ukraine– No.3

Clarifications for bidders

	CLARIFICATION REQUEST	ANSWER
1	<p>Question regarding technical specifications of Freight Vehicle for the transportation of radioactive packages.</p> <p>Set of winter tires on steel rims and a set of summer tires are required for the Freight vehicle. However, for heavy vehicles winter and summer tires usually are not needed, as a rule, it is all-season tires. Please, clarify if the all-season tires will be acceptable?</p>	All-season tyres are acceptable.
2	<p>Questions regarding technical specifications of Specialized Cargo Vehicle</p> <p>I. Could you please clarify if cargo vehicle should be a chassis cab with a custom body build on in or should it be a standard cargo van?</p> <p>II. Technical specifications for the weight of the vehicle are following:</p> <p style="padding-left: 40px;">a) Maximum gross combination weight rating: 7,000 kg.</p> <p style="padding-left: 40px;">b) Payload maximum: 1900 kg.</p> <p>Even the lightest van with GVW 3.5 t. will have 7 t gross combination weight. To reach a required 1900 kg payload, GVW should be over 5 t., and GCW will be over 8 t. There seems to be conflict between the specifications, so please clarify if a vehicle with 5 t GVW and gross combination weight rating more than 8 tons will be acceptable.</p> <p>III. Set of winter tires on steel rims and a set of summer tires are required for the Specialized Cargo Vehicle. However, for a 5 t GVW vehicles winter and summer tires usually are not needed, as a rule, it is all-season tires. Please, clarify if the all-season tires will be acceptable?</p>	<p>I. it should be a standard cargo van</p> <p>II. Vehicle with 5t GVW and gross combination weight rating of 8 tons is acceptable, providing that the original intention in the specifications was to have a payload capacity of 1900 kg and a still be able to tow a trailer with this van.</p> <p>III. All-season tyres are acceptable.</p>

3	<p>Question regarding technical specifications of forklift.</p> <p>In the technical specifications it is required that Vehicle shall have the capability to move on streets and limited unimproved. Could you please advise if this meant that forklift should also be registered in Ukraine as a mean of transport and get the license plate to be able to drive in public roads? If a registration is needed, please advise who will be responsible for this?</p>	<p>We think that forklift is to be used inside a facility, rather than on public roads.</p>
4	<p>General question regarding the vehicle's registration.</p> <p>Who will be responsible for the registration of all the vehicles in local authorities?</p>	<p>The end user will be responsible for registrations, however, all the required documentation for the registration needs to be provided by the supplier.</p>
