FOR THE CELEBRATION OF  
THE UNHCR- UNICER STUDY ON ACCESS TO SOCIAL PROTECTION AND  
HEALTHCARE OF STATELESS CHILDREN**

**Questions & Answers**

Nº	Question	UNHCR's Answer
	The ToR mentions: " Ability to travel to remote areas within Thailand". Can you indicate which places would be likely to visit, knowing that UNHCR / UNICEF projects might be relevant locations to visit	The provinces that may require travelling are those with high number of stateless people. The target provinces will be defined in consultation with UNHCR/ UNICEF.
	Will the desk research input likely be in Thai or English?	Most of the studies regarding access to services for stateless people/ children in Thailand are in Thai. The researchers will have to look at Cabinet Resolutions and relevant laws which are only in Thai. Thus, the researchers must be able to read and understand Thai.
	What do you deem a realistic sample size for this study?	This will be in consultation with UNHCR/UNICEF.
	We are unsure if the whole report should exist of max. 5 pages, or this is solely for the executive summary?	Only the executive summary. However, the numbers of pages are flexible.
	To which degree can UNHCR / UNICEF facilitate access and logistics?	The team of researchers are to do all these works themselves. UNHCR/UNICEF will not help in facilitating access and logistics.
	In Annex A. Terms of Reference, section 5) <i>Team composition, degree of expertise and qualifications</i> , under experience and qualification Thai language is required of both the team leader and team members. Is this a mandatory requirement for all team members? Will a proposal that puts forth a team including both Thai and non-Thai speakers be considered?	Due to the scope, area, content of this research study, the team leaders and team members must be able understand Thai (read/write/speak/listen) fluently. Interpreters from Thai – ethnic minority language may be required during the data collection phrase.
