

RSA Tokens	 <b>IAEA</b> International Atomic Energy Agency	IAEA Specification Dated 28/02/2024
------------	---	--

## IAEA Specification

### RSA Hardware and Software Tokens

#### 1. Purpose

The RSA SecurID Token serves as a two-factor authentication technology for remote access, currently utilized by the International Atomic Energy Agency (hereinafter referred to as IAEA or Agency). This technology ensures secure connections to the Agency's servers, enabling users to access internal resources from any device, at any time. The IAEA plans to procure additional software tokens to replenish its inventory and renew the RSA Authentication Manager Base Server License.

#### 2. Deliverable Items

- a. The Contractor shall provide the following Token licences to the International Atomic Energy Agency.

No	Item Description	Qty
1	Renewal of RSA Authentication Manager Base Server Licence maintenance for 2630 users for the period 1 Apr 2024 to 31 Mar 2025 Serial no. 81001176	1
2	RSA Software tokens with cost options for 24, 36, and 60 months, along with related maintenance (SecurID Software Token)	600

- b. The Contractor shall be an approved reseller of RSA products and authorised to sell and distribute within the Austrian market.
- c. The Contractor shall deliver the licences by 30 March 2024.
