

EXPRESSION OF INTEREST TEMPLATE

1 Expression of interest

{ **Organization/Company Name** }, express our interest to be considered in the TRANSEND support program to explore pathways for the early retirement of our fossil fuel-based power plant. We are considering retiring our plant below its technical life as explained in Section 3.

We are interested in working with UNOPS-ETP through the TRANSEND project to explore retirement strategies and identify the most suitable low carbon transition alternatives.

If selected to be provided with advisory services, we are open to engage in further dialogue and in the event of proceeding, providing the necessary data and information for the analyses.

We reiterate our commitment to a just transition process with a signed statement in Section 4.

Information provided below on the fossil fuel-based plant submitted for potential advisory support are true and correct to the best of my knowledge.

| Offtaker: | |

3 Statement of Intent

Describe the motivations for submitting an expression of interest. Include details about why you are interested in this opportunity and why your power plant should be selected. Highlight any relevant information that make your facility a strong candidate for a pilot case. (Max of 500 words)

4 Commitment to a Just Transition

The transition away from fossil fuel carries social implications, particularly related to job displacement and community welfare. Social impact analysis holds equal weight alongside expected financial and technical analyses for early retirement. Moreover, a proactive approach is paramount. Inclusive planning with immediate action on mitigation strategies must be integrated to ensure a smooth transition for impacted workers and communities.

{ **Organization/Company Name** }, acknowledges the significance of the social dimension of the energy transition process and is committed to integrate the necessary actions to ensure that the process is just, inclusive, and transparent to all relevant stakeholder.

Our initial plans for ensuring a just transition is summarized in Section 5.

5 Plans for a Just Transition

Please list and describe the long-term actions planned to ensure a fair transition for the workforce and the wider community due to the early retirement of the power plant. Include estimates of the number of employees and other stakeholders that could potentially be affected. Describe the potential adverse impact of the transition to their livelihood. Also identify foreseen positive impacts and opportunities of the transition to employees and the community. While it is noted that the details will be determined over time, please highlight how your organization will facilitate the realization of these opportunities. Also, highlight any other relevant information that makes your facility a strong candidate for a pilot case. (Max of 500 words)

6 Focal Person

Identify who will be the point of contact from your organization. All communication
