| Title | Supply of one (1) Gold Medal - as prize for the IMO award. |
| Background information | A 14-carat gold medal (International Meteorological Organization (IMO) Prize) is awarded every year by the WMO Secretary General to suitable candidates in recognition of outstanding contributions in the field of meteorology and hydrology. (https://wmo.int/about-wmo/awards/international-meteorological-organization-imo-prize) |
| Standards | <p>Quality Standards: ISO 9001 or equivalent</p> <ul style="list-style-type: none"> Tolerance: Dimensional tolerance should conform to a tight tolerance of ± 0.1 mm. Plating Quality: Should be free of contaminants or irregularities. Standards for durability, resistance to wear, and tarnish resistance. The plating should pass a non-destructive thickness test, ideally an x-ray fluorescence test. Surface Finish Quality: Polished surface should have a mirror-like finish without visible scratches, dents, imperfections tool marks, blemishes and rough edges or burrs along the perimeter. Scratch and wear resistance. Tarnish resistance. A Certificate of Authenticity for the alloy composition should be provided to verify the gold content. <p>Production and Inspection Standards:</p> <ul style="list-style-type: none"> Manufacturing Standards: Reference to any relevant standards, such as ISO quality standards. Inspection Criteria: Details on inspection procedures, such as visual checks and testing for plating thickness. |
| Requirements | <ul style="list-style-type: none"> The gold medal shall be struck in 14 carat gold, 57 mm in diameter and 6.350 mm in thickness. Please provide exact composition of the 14-carat gold in use (shall be 58.5% pure gold), (i.e., percentage of purity and alloy, composition and other metals and description of plating). Gold Plating purity: shall be 24-carat gold (99% pure). Gold Plating thickness: shall be 5 microns to ensure the medal has a luxurious appearance, retains durability, and is made of high-quality materials suitable for this prestigious award. On one side the medal will bear the official WMO emblem (please see File). On the other side it will bear a suitable inscription (please see Markings). The name of the recipient will in each case be engraved around the rim of the medal. Dimension/Thickness of the rim of the medal on which the name of recipient is to be engraved is 6.350 mm. Please indicate total estimated weight and thickness. |
