

The ATscale team will be conducting country missions to the Solomon Islands, Fiji, and Kiribati on the following dates:

- Solomon Islands: **December 2–5, 2024**
- Fiji: **December 9–11, 2024**
- Kiribati: **December 12–14, 2024**

**Objectives of the Missions:**

1. **Meet with the government leadership-** the first objective is to galvanize political will and secure support and commitment from the highest level of leadership in the selected countries. This will involve discussions with (Ministers- Health, Education, Social Welfare, etc.) and programme leadership (programme focal point, directors, managers, etc.).
2. **Understand country situation/context:** Gather insights into partner countries' infrastructure, regulatory, and procurement capabilities to better align ATscale's support and tailor technical assistance to address country-specific challenges, ensuring effective and sustainable program implementation.
3. **Disseminating information to in-country partners:** Another key objective is to inform and educate in-country partners about upcoming funding opportunities and calls for proposals to the programme. The in-country partner may include local and international NGOs, UN agencies, and civil societies, including Organizations of Persons with Disabilities working in the area of health, inclusive education, disability, and other related assistive technology provision.

**Please note-**If potential partners are interested in scheduling a meeting during the mission, please email us at [bids@atscalepartnership.org](mailto:bids@atscalepartnership.org). While our priority is to meet with government counterparts, we will accommodate requests from potential in-country partners as time permits.
