

## Clarifications No. 2

### Question 1:

*What would be please the average flying height of the hopper?*

### Answer 1:

We are not sure if by hopper you mean the drone. If so, we do not know and this will have to be tested in the field.

### Question 2:

*Which countrie(s) would be please concerned?*

### Answer 2:

Algeria, Morocco, Libya, Mauritania, Senegal, Mali, Niger, Chad, Sudan, Egypt, Eritrea, Ethiopia, Djibouti, Somalia, Yemen, Saudi Arabia, Oman, Iran, Pakistan, India.

### Question 3:

*What is the average temperature of the species in flight?*

### Answer 3:

Field condition temperatures when drones will be used will range from 15-55C

### Question 4:

*Could you please confirm or provide the correct answer : The swarms fly only by day, and the solitary species fly at night?*

### Answer 4:

yes but this has minimal if any impact on the use of drones since they will only be used during daylight hours.
