TERMS OF REFERENCE

Private Sector Engagement Services for WSSCC

1. General Background

The Water Supply and Sanitation Collaborative Council (WSSCC), is based in Geneva, Switzerland under a hosting arrangement with the United Nations Office for Project Services (UNOPS) Secretariat. Through its Strategic Plan 2017-2020, WSSCC (herein also referred to as 'the Council'), contributes to the achievement of SDG target 6.2, therewith impacting on a range of other Sustainable Development Goals. The overall aim is to ensure that nobody is left behind and that rights are afforded to those most vulnerable in society.

The Council's approach is centred on an ambitious vision of using targeted investments in collective behaviour change and strengthening national and local enabling environments, combined with strategically convening and influencing partners, to catalyse and drive achievement of adequate and equitable sanitation and hygiene for all. To this end, WSSCC manages the Global Sanitation Fund, facilitates sector coordination at national, regional and global levels, supports professional development, and advocates on behalf of the 2.5 billion people without a clean, safe toilet to use. More information on WSSCC can be found at: www.wsscc.org.

2. Background

The role of the private sector in WASH is not only crucial, in light of bridging the financial gap, but the sector is also well-placed to provide cost-effective and innovative solutions to WASH infrastructures; to provide capacity building and trainings of WASH entrepreneurs; to create sustainability around WASH projects through monitoring and evaluation; to raise private sector WASH advocacy ambassadors.

Nigeria's bold ambition and strong political commitment to halt open defecation in Nigeria through the 'Clean Nigeria Campaign', coupled with the great potential for the Nigerian private sector to contribute to this agenda, provides an unprecedented opportunity for WSSCC to set up a Nigeria Sanitation Fund. This fund will help the government develop its engagement in bridging any financial gaps through partnerships with the private sector. Furthermore, as WSSCC is developing its new strategy, this innovative partnership could open the door to further engagement with the private sector, leveraging public funding from both international donors to WSSCC and the Nigerian public sector at national and regional levels.

3. Objectives of the assignment

The political momentum, private sector potential and WSSCC experience in the country, constitute an unprecedented opportunity to develop innovative financing mechanisms with the Nigerian private sector to meet water and sanitation national targets through the establishment of a Nigerian sanitation fund that can receive private sector contributions in support of Nigeria's objectives. Targeted industries would include oil and gas, food and beverage, pharmaceutical and manufacturing. The targets will also include philanthropists, diaspora populations and private donations.

To support the project, WSSCC wishes to recruit a consultant who has significant experience with the private sector in Nigeria to help set up a private sector fund which will focus on mobilizing capital from the private sector as a resource of additional capital. The consultant will be supported to the extent possible by the office of the WSSCC national coordinator in Nigeria.

4. Scope of Work

- ✓ To develop mutually-beneficial, functioning relationships with private sector companies in Nigeria and gain access to previously unengaged audiences, broader networks, and new knowledge and

- advocacy bases
- ✓ To identify all possible private sector entities directly or indirectly engaged in Nigeria with particular focus on private sector entities functioning/ operating and engaged in water, hygiene and sanitation related activities
- ✓ To collect detailed information on the nature, scope, terms and level of engagement of the private sector in water, hygiene and sanitation with key focus to trends on how policy shifts will affect this environment in the future
- ✓ To provide a draft mapping report that would serve as a reliable reference tool for WSSCC to strengthen future collaboration and dialogue with the private sector in Nigeria
- ✓ To ensure the support and collaboration of the private sector in Nigeria for the promotion of water, hygiene and sanitation activities

5. Timeframe and Estimated Schedule

Following minimum deliverables will be ensured by the supplier:

Milestones and deliverables	Estimated Deliverable Date

1. A draft proposal on methods and process for the review
2. The name(s) of the consultant(s) and a summary of relevant experience(s)
3. CV(s) of proposed consultant(s)
4. Timeframe and work plan provided to demonstrate that the proposer will complete the work in the time allotted per Section II

The assignment is for a duration of 60 days over the period October 2019 – February 2020 and payments will be delivery-based. Number of travels: max. 10

Travels either taken care of by the office (flights) or through Travel Expense Claim (TEC) upon justification. Other expenses: Rent of the roundtable events room, provision of drinks and food for the events through Travel Expense Claim (TEC) upon justification.

Lead Consultant:

Education

- ✓ Master's degree in business or public administration, social science, economy, international and public affairs.

Work Experience

- ✓ Minimum 5 years of experience in forging partnerships, private sector, and experience in advocating for water and sanitation in Nigeria and regionally
- ✓ Outstanding research and analytical skills

7. Impact of provided services

The mobilization of private sector resources in Nigeria will have a combined impact: it will allow to contribute more intensively to Nigeria's plans to make the country Open Defecation Free through an increased budget, it will leverage this funding as an incentive for government and state co-financing, and it will convincing the traditional donors to WSSCC of the multiplier effect of their pooled funding to the organization and hopefully attract additional funding.
