

Annex B Financial Offer Form

RFP: HCR/IRQER/2019/RFP-053

Development of Designs for Shelter and Infrastructure Related Projects in Iraq

The bidder shall quote the average daily price in United States Dollars (USD) of a team to perform the following projects under the following conditions:

- the project is implemented anywhere in Iraq,
- the quotation shall consider the full design of the project as per the conditions set in the Terms of Reference,
- the quotation shall consider a full team of professionals required to perform the design of the specified project,
- the cost is inclusive of all charges (honoraria, per diems, communication, material/equipment required to produce the deliverables). However,
- the costs related to transportation/accommodation are not included as these costs will be quoted during the definition of the detailed Task Assignment (TA) of any specific project.

Type of Project to be designed (indicative)	Daily rate (USD) for a full team of required professionals to complete project design as required in the TORs.
Building project: Improvement of a 2-story building to serve as a registration center. Each floor is 18x20 sqm (gross area). The project includes site preparation, providing materials and labour for civil works, wall partition, and construction of a waiting area, installing prefab sanitation facilities with all required accessories and fittings, and painting supply. The project also includes delivery and installation of a Super Silent Diesel Generator.	
Transport Infrastructure: Upgrading the Internal Roads with Double Dressing (112,500 m2). The project includes the provision of materials and labour. The detailed activities include road preparation construction of sub-base, double dressing works, construction of roadside surface channels (5,000 m2).	
Power Generation and Supply: Provision and installation of solar panel systems for operating the 10 deep wells with existing submersible pumps. The expected production capacity is 38 Kw per system. The project includes the necessary connection and protection systems, installing a support structure for the solar panels, selecting and installing a pump controller system (smart inverter), installing a washing/flushing system, installing a fence around the solar system field.	
Water and Sanitation systems: Implementation of water supply system for a refugee camp. The project includes the provision of materials and labor to construct a water supply project in Iraq to supply water to a refugee camps of 32,000 refugees. The detailed activities include the rehabilitation of 4 existing boreholes /deep wells, provision and installation of 4 new submersible pumps, rehabilitation of main pipeline (3.2 km), providing & installing 2 new booster pumps, and the construction of one pump house with related civil, electrical and mechanical work.	

Other construction works: Rehabilitation of a public park in urban area of 24,000 sqm. The project includes provision of materials and labour to complete the specified projects. The detailed activities includes the rehabilitation of the WASH system, rehabilitation of the toilets, electrical system, repairing the fence around the park, installing a new game sets for children, replacing the tartan tiles, installing wooden seats (chairs), rehabilitation of the guard room, replacing access park gates, and installing decorative lighting system.

Clarification Notes:

1. The quantity and specifics provided above are intended to enable a fair comparison of prices amongst the participating vendors. For example, the double dressing road of 112,500 sqm is based on our last year requirement. Should the design of a road of less or more than that is required, the estimated completion time of the design will determine the cost which will be fixed during discussion between UNHCR Technical Team and selected vendor and then multiplied by the daily cost of the team of professionals before a Purchase Order is issued.
2. UNHCR estimates that 7-10 calendar days are required from date of receipt of the ToRs to produce the first draft of the projects described above.
